***In order to hold this course, a minimum enrollment of 20 participants is required.**

The Evolution of Electric Cooperative Power Supply

NRECA Course 961.1

1½ WECA Skill Builder Credits

Electric co-op boards face a rapidly evolving energy landscape where power supply decisions are more complex, involve greater risks and have greater cost consequences for members than ever before. The low price of natural gas, the combination of state renewable portfolio requirements, the falling prices of wind and solar and environmental regulations are leading a fundamental shift in the U.S. electricity generation portfolio. This shift has significant implications for electricity suppliers and for consumers. This course focuses on strategies boards can pursue in the face of this uncertainty including understanding what members want, working closely with power suppliers, communicating with members and being their trusted energy advisor.

Key topics:

- Brief History on “How We Got Here”
- Regulation
- Transmission/Markets
- The Electric Cooperative Today

IMPORTANT: Class size is limited to to the first 30 participants. A waiting list will be kept in the event of any cancellation(s) are made after the class is full.
